

JET COX MODUGLASS

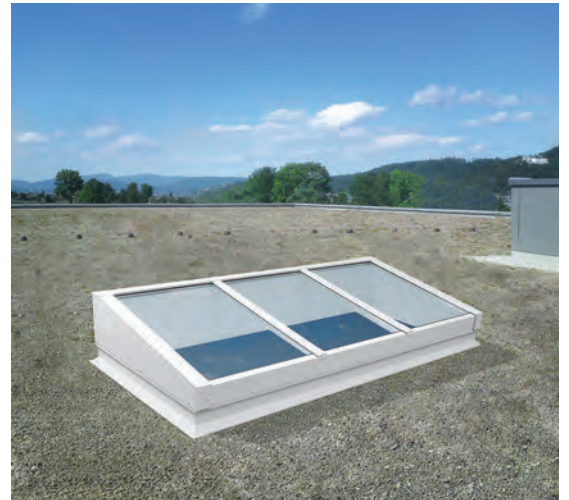

The JET COX Moduglass is a compact, free standing glass skylight. Engineered with slim, elegant aluminium profiles you can be sure of maximum daylight.

Moduglas is a well-designed, well insulated unit that is supplied pre-fabricated ready for direct installation. Installation is made easier with inclusion of the RO16 insulated, thermally efficient PVC-u upstand. The upstand once securely attached to the roof is then weathered in the same way as a standard rooflight.

Powder coated thermally broken aluminium profiles ensure the finished product offers low annual maintenance.

Manufactured from modular sizes the Moduglas Range is available in two, three, four or five glazing compartments.

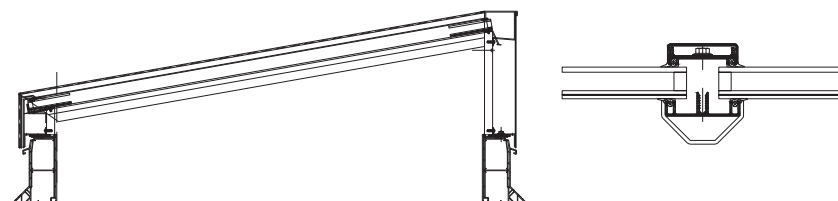

The Moduglas is compatible with most flat roof membrane systems including single ply, GRP, hot melt, asphalt, liquid and lead and comes complete with a 10 year guarantee.

TECHNICAL SPECIFICATION

- **'U' Value 1.1 W/m²K***
- **Light Transmission 76%**
